Experience

Software Engineer, Neuralem (Formerly GS Lab GAVS) - Optimized and modernized production applications using Java (Spring Boot), Python (FastAPI/Flask), and JavaScript (React, Node.js) to improve scalability and maintainability. - Designed and optimized PostgreSQL/MongoDB schemas and developed REST & GraphQL APIs for backend services. - Improved Flask-based data and AI inference services to support efficient real-time processing. - Resolved P0/P1 production incidents in war-room environments across full-stack and cloud systems on AWS and Azure. - Managed Docker and Kubernetes deployments with CI/CD pipelines using Jenkins, GitHub Actions, and Azure DevOps.	08/2022 – 09/2024 Chennai OMR
Senior Engineering Specialist, Zitrino - Worked on GuideLite, a scalable AI assistant platform for Sales, Support, and HR using OpenAI, Azure OpenAI, LangChain, Redis, FastAPI, and React. - Improved AI response performance and reliability through caching, fallback mechanisms, and optimized backend services. - Developed customer-facing AI dashboards using Next.js with SSR for improved performance and search visibility. - Worked on an AI-powered Rich Text Editor using React, TypeScript, and TinyMCE with real-time collaboration, comments, tables, and contextual AI suggestions. - Implemented context-aware AI responses using Pinecone, FAISS, and document embeddings for scalable knowledge retrieval and memory. - Contributed to AI-powered cybersecurity and monitoring solutions for automated threat ingestion, summarization, and visualization using FastAPI, React, Docker, and Kubernetes.	09/2024 – 10/2025 Chennai OMR
Senior Software Engineer, Exotel (via CodersBrain) - Worked on improving a monolithic AI-powered voice bot application using AI Agents and LangChain4j, enhancing task execution, conversation quality, and user experience. - Contributed to the React frontend using Redux, Formik, Yup, and Zed, improving state management, form handling, and UI responsiveness. - Enhanced voice-to-text and text-to-voice workflows with Wavesurfer.js for real-time audio visualization and a better audio experience. - Improved analytics dashboards using ApexCharts and MUI X Charts to provide insights into system usage and performance. - Worked on a Java 21 and Spring Boot backend, integrating OpenAI/Azure OpenAI, PostgreSQL, Redis, gRPC, Keycloak, and Spring Security. - Contributed to AWS and Firebase integrations, including S3 and SES, while improving API communication using Axios and MSW.	10/2025 – 06/2026 Bengaluru
Senior Software Engineer, GlobalLogic India Private Limited  - Worked on improving and optimizing production-grade AI Agents and multi-agent systems using LangGraph, LangChain, AWS Bedrock, and RAG. - Enhanced multi-agent workflows, intent classification, tool calling, and agent orchestration for enterprise applications. - Analyzed and mitigated LLM hallucinations using LangSmith traces to improve agent groundedness, reliability, and response accuracy. - Improved RAG-based AI workflows to deliver more relevant, context-aware, and accurate responses. - Contributed to production monitoring, security, troubleshooting, and performance optimization of AI agents.	06/2026 Bengaluru

Education

BE/B.Tech/BS, Dr. M.G.R. Educational And Research Institute	06/2017 – 07/2021 Chennai
--	------------------------------

Skills

- **Languages:** JavaScript, TypeScript, Python, Java
- **Frontend:** React.js, Next.js, Redux, HTML5, CSS3
- **Backend:** Node.js, Express.js, Spring Boot, FastAPI, Django, Flask
- **Databases:** PostgreSQL
- **AI & LLM:** LangChain, LangGraph, LangSmith, Prompt Engineering
- **Machine Learning:** NumPy, Pandas, Scikit-learn
- **Cloud & DevOps:** Microsoft Azure, Docker, Kubernetes, CI/CD, GitHub Actions
- **Architecture:** Microservices, REST APIs
- **Tools & Monitoring:** Git, Postman, Datadog
- **Tech Stacks:** MERN, MEAN

Achievements

Spot Light Award, Apollo SCM

Achieved CSAT 4 and NPS 10 for exceptional delivery and customer satisfaction.

Scaler Academy Certifications

- Data Structures & Algorithms (DSA) – Mastered core and intermediate concepts.
- JavaScript & Full Stack Development – Proficient in JavaScript, React (Frontend), Node.js, PostgreSQL, Docker, and Cloud Deployment.
- System Design – Expertise in High-Level Design (HLD – Scalability, Microservices) and Low-Level Design (LLD – SOLID Principles, Design Patterns).
- Databases & SQL – Advanced skills in PostgreSQL, including JSON handling and NLP integration.

Additional Certifications

- Database Design & SQL (PostgreSQL) – University of Michigan.
- Agile Fundamentals, ITIL 4 Foundation, ISO 45001 Awareness – Certified in industry-standard methodologies.
